

Axcelerate Ingestion 5.11

Default Fields CSV Load Behavior

CSV Load Behavior

			Crawler Framework			Index Engine		
Internal field name	Display name used for Results list column, Smart Filter, Metadata fly-in etc.	N =do not fill Pre-defined values = use pre-defined values	CSV Load: If Protect Metadata fields is OFF , field content is preserved (P)/can be changed (C) by crawler.	CSV Load: If Protect Metadata fields is ON, this field is preserved (P)	Comment	CSV Load: If Override storage manager metadata when storing native is OFF , field content is preserved (P)/changed (C) by index engine	CSV Load: If Override storage manager metadata when storing native is ON, this field is preserved (P)	Comment
Conversation	-	N	C	P	The field is used for chat representation. Do not change!			
rm_footer	-					C	C	If you do not want this field to be changed by the index engine, disable the footer detection feature.
revision_number	-	N	C	P				
rm_filesize	-		C	P	see documentation			
meta_recipient	All Recipients		C	P				
rm_application_level_security	Application level security	N						
rm_attachmentroot	Attachment Family ID		C	P	see documentation			
attachment	Attachment Names		C	P				
att_p	Attachment Text		C	P				
rm_childlink	Attachments/Embeddings		C	P				
rm_messagecount	Chat Count		C	P				
rm_chatevent	Chat Event Type	Pre-defined values	C	P				
rm_creationdate	Creation Date		C	P	Crawler always sets missing time zone and can replace invalid dates, see documentation			
rm_custodian	Custodian		C	P				
rm_source	Data Source Name		C	P				
rm_deliverydate	Date Received		C	P	Crawler always sets missing time zone and can replace invalid dates, see documentation			
meta_documentcharacteristics	Document Characteristics	Pre-defined values	C	P				
meta_docdate	Document Date		C	P				
meta_title	Document Title		C	P				

CSV Load Behavior

Crawler Framework

Caution: This list contains important hints. Read *CSV Load documentation* and the *Incoming Data Specification* carefully. It is recommended to have Recommend Support check your CSV Load file before loading into a production system.

rm_doctype	Document Type	Pre-defined values	C	P	Influences diverse features, see documentation			
meta_fromdomain	Sender Domain		C	P				
meta_recipientdomain	All Recipients Domain		C	P				
rm_duplicateStatus	Duplicate Status							
meta_bcc	Email BCC		C	P				
meta_cc	Email CC		C	P				
rmerror	Exception		C	P+C	existing values are preserved, additions can happen caused by errors			
rmerrorclass	Exception Class		C	P+C	existing values are preserved, additions can happen caused by errors			
rm_resolutions	Exception Resolutions	N						
rmerrortype	Exception Type		C	P+C	existing values are preserved, additions can happen caused by errors			
rm_exports	Exports	N						
rm_fileextension	File Extension		C	P				
fileformat	File Format							
rm_filename	File Name		C	P				
virtual_filesize	File Size							
meta_filesizetype	File Size Type		C	P				
rm_foldername	Folder Name		C	P				
rm_numeric_identifier	ID					C	P/C	Importing this field via CSV Load may lead to undesired results. Read documentation carefully.
rm_importanceflag	Importance		C	P

rm_document_language	Language					C	P/C	Protection only if language tagger is active and ISO language code is used. Read documentation carefully.
rm_loadbatch	Load Batch Name		C	P				
rm_location	Location		C	P				
rm_document_hold	Matter	N (see CSV Data Load Limitations)						
rm_md5	MD5 Hash		C	P				
rm_mimetype	Mime Type		C	P	Protection for this field is not compatible with "Use MIME type from native" option.			
rm_lastmodifieddate	Modification Date		C	P	Crawlers always sets missing time zone and can replace invalid dates, see documentation			
rm_copy_location	Native Location	N (see CSV Data Load Limitations) If native files are copied into the Axcelerate system during CSV Load, do not fill via CSV load file.	C	P				
rm_copy	Native Status	Pre-defined values				C	P	
form	NSF Form		C	P				
rmNumberImagePages	Number Image Pages							
rm_attachmentcount	Number of Attachments		C	P				
rm_embedding count	Number of Embeddings		C	P				
office_flags	Office Flags		C	P				
rm_parentlink	Parent ID		C	P				
meta_read	Read/Unread		C	P				
meta_to	Recipient Address		C	P
